

~~Семестровая работа №3~~
 Домашняя работа №3
 №6.86

Дано

$$0 < x < \frac{a}{3}$$

$P = ?$

Решение:

$$P = \int \psi \psi^* dx$$

$$\frac{\partial^2 \psi}{\partial x^2} + \frac{\partial^2 \psi}{\partial y^2} + \frac{2m}{\hbar} (E - U) \psi = 0$$

$$\psi = A \sin k_1 x \sin k_2 y, \text{ где}$$

$$k_1 = \frac{2m}{\hbar} E_1, k_2 = \frac{2m}{\hbar} E_2 \quad \left\{ \begin{array}{l} \psi = 0 \text{ at } x=a, k_1 = \frac{\pi n_1}{a} \\ \psi = 0 \text{ at } y=b, k_2 = \frac{\pi n_2}{b} \end{array} \right. \Rightarrow$$

$$\Rightarrow A = \sqrt{\frac{4}{ab}} \Rightarrow \psi = \sqrt{\frac{4}{ab}} \sin \frac{\pi x}{a} \sin \frac{\pi y}{b}$$

$$P = \int_0^{a/3} \int_0^b \left(\frac{ab}{4} \right)^{-1} \sin^2 \frac{\pi x}{a} \sin^2 \frac{\pi y}{b} dx dy = \dots =$$

$$= \frac{1}{3} - \frac{\sqrt{3}}{4\pi} \approx 19\%$$

D

Решение:

$$D \approx e^{-\frac{2}{\hbar} \int_{x_1}^{x_2} \sqrt{2m(U-E)} dx}$$

$$V(x_2) = V(x_1) = E \quad \text{и} \quad V(x) > E \quad \text{в} \quad x_2 > x > x_1$$

$$\text{Отб: } D \approx \exp\left(-\frac{2L}{\hbar} \sqrt{2m(U_0-E)}\right) +$$
